

Sweet Gas Plant Operator (Contract Positions)

THE COMPANY

Headquartered in Calgary, Alberta and with operations near Fort St. John, British Columbia, Pacific Canbriam Energy Limited (“PCE”) is committed to our 5Cs business philosophy of creating benefits for our Community, Country, Climate, Customer, and Company.

Pacific Canbriam believes that the quality of its resource is a strategic asset that differentiates the company. Early efforts to identify a scalable, low cost supply source led to a focus in the Altares and Kobes Montney regions in northeast B.C. The Montney is a world class resource and Altares is among the highest quality areas. The region possesses a unique combination of thickness and over-pressure, which contributes to highly efficient stacked resource development and strong well deliverability. Pacific Canbriam’s Montney resource also possesses a high liquids content and overall rock quality that translates into a highly competitive supply cost.

We believe that teamwork is the foundation of our success. We have established a culture where problem solving skills and excellence are highly valued. Individual technical disciplines collaborate to achieve common objectives and continuously improve results. PCE’s strategy and its culture are centred on this commitment.

The next iteration of our integrated approach relates to the planned export of our natural gas to markets in growing economies overseas. To achieve this aim, Pacific Canbriam will supply B.C.’s proposed Woodfibre LNG project, which will liquefy the natural gas and load it into vessels. The natural gas will be shipped to help supply a growing demand for cleaner sources of energy in Asia.

THE POSITION

PCE is looking to hire Gas Plant Operators to join our growing team. Reporting to the Plant Lead Operators, you will be responsible to effectively participate as a team member in the safe operation and maintenance of our Sweet Gas Processing Facilities in the Altares area. This is a camp based position based on a 7/7 or 14/14 rotation, 12 hour shifts; both day/night shifts are required. PCE’s camp is located approximately 124kms northwest of Fort St. John, BC near Hudson’s Hope, BC. The successful candidates must be prepared to work extra hours and be on-call as required. Job applicants should expect to be drug/alcohol tested as part of the hiring process. The individual(s) will have the following core responsibilities:

Core Responsibilities

- Daily plant site tasks
- Control room experience an asset
- Recognize operational problems and troubleshoot
- Recognize abnormal operating conditions of equipment
- Daily production reporting
- Adhere to and engage in PCE’s safety protocols
- Conduct work within the procedures, standards and policies that are in place

THE INDIVIDUAL

This is an exciting and challenging position in a growing organization. As such, it is critical that the successful candidate possesses the following experience, certifications and requirements:

- 5+ years of related industry experience (preferred)
- Valid 4th class (or higher) Power Engineering Certificate
- In good standing with Technical Safety BC (or able to inter-provincially transfer certification)
- Valid Class 5 drivers' license
- Safety certification including First Aid, H2S Alive
- Independent Contracting Documents – liability insurance, Certificate of Incorporation, proof of WCB coverage, vehicle insurance
- Plant processes including compression, refrigeration and stabilization
- Ability to demonstrate computer literacy

APPLICATION PROCESS

Please submit your resume and a cover letter to hr@pacific-canbriam.ca expressing your interest in the position and address your cover letter to **Terence Reynolds and Bill Spence, Plant Shift Lead**. To be considered, your cover letter **MUST** detail how your specific expertise and experience relates to the qualification requirements.

Applications are being accepted until **5:00 pm on Monday, June 27th, 2022**.
