

## Production Engineer/Sr. Production Technologist

### THE COMPANY

Headquartered in Calgary, Alberta and with operations near Fort St. John, British Columbia, Pacific Canbriam Energy Limited ("PCE") is committed to our 5Cs business philosophy of creating benefits for our Community, Country, Climate, Customer, and Company.

PCE believes that the quality of its resource is a strategic asset that differentiates the company. Early efforts to identify a scalable, low cost supply source led to a focus in the Altares and Kobes Montney regions in northeast B.C. The Montney is a world class resource and Altares is among the highest quality areas. The region possesses a unique combination of thickness and over-pressure, which contributes to highly efficient stacked resource development and strong well deliverability. Pacific Canbriam's Montney resource also possesses a high liquids content and overall rock quality that translates into a highly competitive supply cost.

We believe that teamwork is the foundation of our success. We have established a culture where problem solving skills and critical thinking are highly valued. Individual technical disciplines collaborate to achieve common objectives and continuously improve results. PCE's strategy and its culture are centred on this commitment.

PCE is committed to protecting people and the environment through responsible natural resource development. We are proud to engage in industry-leading sustainability practices and promote continuous improvement throughout all areas of environment, social and governance (ESG) topics.

The next iteration of our integrated approach relates to the planned export of our natural gas to markets in growing economies overseas. To achieve this aim, PCE will supply B.C.'s proposed Woodfibre LNG project, which will liquefy the natural gas and load it into vessels. The natural gas will be shipped to help supply a growing demand for cleaner sources of energy in Asia.

### THE POSITION

PCE is currently searching for a Production Engineer/Sr. Production Technologist based in Calgary. Reporting into the Manager, Production & Facilities, this role will be responsible for production planning, forecasting, optimization, and project management of our inactive well program. As a member of the larger multi-disciplinary team across the company, the Production Engineer/Technologist will liaise and collaborate with several different groups within PCE including Field Operations, Facility Engineering, Reservoir Engineering, Drilling & Completions, Regulatory, Accounting and Corporate Development.

#### ***Key Responsibilities***

- Day to day Production Optimization and Nodal Analysis focused on maximizing production and revenue for ~200 wells in the Montney Region.
- Prioritize safety above all, ensuring that every process and procedure adheres to the highest safety standards and protocols.
- Monthly Production Analysis associated with unconventional Montney Gas Producing wells focused on production declines, and corporate production forecasting.
- Annual Production Volume Budgeting.
- Support Field Operations, D&C, Subsurface, Finance, Facilities, and Production Accounting teams from day to day troubleshooting and monthly reporting to long term planning initiatives.
- Management of PCE's inactive well program including but not limited to:
  - Surface Casing Vent Flow technical reviews
  - British Columbia Dormant Site Program
  - Wellbore Abandonments
  - Facility Decommissioning

- Site and Pipeline Right of Way Reclamation and Remediation budgeting, scheduling and program management
- Support in PCE's ESG and Equitable Origins initiatives.
- Travel to the Ft. St. John area will be required on occasion.

## THE INDIVIDUAL

### *About You*

- Strong safety mindset.
- Demonstrates a deep understanding of process engineering principles and practices.
- Analyzes complex problems, identifies root causes, and develops effective solutions.
- Collaborates effectively with multidisciplinary teams, driving alignment and achieving shared objectives.
- Communicates technical information clearly and effectively to a diverse audience.
- Adapts to changing priorities, manages multiple projects, and delivers results under tight deadlines.
- Proactively identifies opportunities for improvement and champions innovative solutions.

### *Qualifications*

- For Production Engineer background - Bachelor's degree in Chemical, Petroleum or Process Engineering. A Master's degree or relevant certifications would be an advantage
- For Sr. Production Technologist background - Accredited /Diploma (Chemical or Petroleum preferred)
- 10+ years of experience as a Process/Chemical Engineer, preferably in gas processing or a related resource industry (Refining, Upgrading, Oil Sands, Mining)
- Field experience in Oil and Gas operations an asset.
- Detail-oriented, team player, committed to continuous improvement, and a strong focus on process safety
- Previous NEBC work experience in wellbore workovers and interventions would be considered a definite asset.
- Proficient in Peloton ProdView, Valnav, Piper, HIS Harmony, Geoscout/PetroNinja, P2 Energy Qbyte, Tibco Spotfire
- Skilled in MS Excel, Powerpoint, Project.
- Strong knowledge of field operations, equipment and processes
- Strong analytical and problem-solving skills, proficiency in process simulation software, excellent communication skills, and a thorough understanding of process engineering principles

## APPLICATION PROCESS

Please submit your resume and a cover letter on our [Careers Page](#). Be sure to address your cover letter to **Manager, Production and Facilities**, indicating your interest in the position and how your experience meets or exceeds the qualifications. Pacific Canbriam Energy thanks all candidates however only those selected for an interview will be contacted.

*PCE is proud to be an equal opportunity employer. We firmly believe that having a diverse team not only celebrates our differences, but also drives innovation while optimizing performance. We commit to fostering a diverse, equitable and inclusive environment, where talented people collaborate to continuously improve - collectively building an extraordinary vision for the future.*

*PCE encourages qualified applicants of any race, religious belief, colour, national or ethnic origin, disability, age, marital or family status, sex or sexual orientation, gender identity or expression to apply. Hiring decisions are based on merit, qualifications and unique business needs.*

*We do not tolerate any discrimination, harassment or workplace violence and will investigate and remedy any claims in a timely manner and take appropriate corrective action.*

*PCE is committed to providing reasonable accommodations for qualified individuals with disabilities. If you require assistance with this application please reach out to [HR@pacific-canbriam.ca](mailto:HR@pacific-canbriam.ca)*
