

Construction Superintendent

THE COMPANY

Headquartered in Calgary, Alberta and with operations near Fort St. John, British Columbia, Pacific Canbriam Energy Limited ("PCE") is committed to our 5Cs business philosophy of creating benefits for our Community, Country, Climate, Customer, and Company.

PCE believes that the quality of its resource is a strategic asset that differentiates the company. Early efforts to identify a scalable, low cost supply source led to a focus in the Altares and Kobes Montney regions in northeast B.C. The Montney is a world class resource and Altares is among the highest quality areas. The region possesses a unique combination of thickness and over-pressure, which contributes to highly efficient stacked resource development and strong well deliverability. Pacific Canbriam's Montney resource also possesses a high liquids content and overall rock quality that translates into a highly competitive supply cost.

We believe that teamwork is the foundation of our success. We have established a culture where problem solving skills and critical thinking are highly valued. Individual technical disciplines collaborate to achieve common objectives and continuously improve results. PCE's strategy and its culture are centred on this commitment.

The next iteration of our integrated approach relates to the planned export of our natural gas to markets in growing economies overseas. To achieve this aim, PCE will supply B.C.'s proposed Woodfibre LNG project, which will liquefy the natural gas and load it into vessels. The natural gas will be shipped to help supply a growing demand for cleaner sources of energy in Asia.

THE POSITION

PCE is currently searching for a Construction Superintendent that will report to the Manager, Drilling, Completions & Construction. This role is responsible for construction of new leases, roads and their continued maintenance. The Construction Superintendent will work with all groups of the company and third-party road users as well as communicate with Government bodies for all road, lease and earth moving projects. The position is based in Calgary with regular field visits during the time of projects execution.

Key Responsibilities

- Project management of Road and Lease construction
 - Collaborate with subsurface team on planning best locations for new leases and access
 - Work with field supervisor to organize scouting and surveying of new leases and roads
 - Review plans and surveys for lease and road builds
 - Follow PCE procurement policies securing bids for work
 - Execute construction projects in an efficient and safe manner
 - Ensure daily reports are accurate and reflect all pertinent information
 - Track costs
 - Conduct look backs on projects for continuous improvement
- Build productive relations with BC government (MOTi) road division
- Manage 3rd party road users

- Available to take field calls when executing operations
- Travel to the field as and when required
- Champion PCE's HSE policies and ESG commitments

THE INDIVIDUAL

About You

- Strong organization, communication and interpersonal skills and the ability to work effectively with diverse teams across the business.
- Ability to work with minimal supervision, taking multiple tasks across the finish line simultaneously.
- Excellent analytical and problem-solving skills.
- Self-motivated and strong time management skills.
- Excellent communication and organization skills.
- Ability to self-start, prioritize workload.
- Always looking for a more efficient way to execute a project.

Qualifications

- Minimum 10 years supervisory and/or related experience in lease and road construction
- Civil Engineer Technology Diploma or Civil Engineering degree, or equivalent education would be an asset.
- Previous British Columbia work experience is preferred.
- Working knowledge of AFE Navigator, Open Invoice, Petrosight and Microsoft Programs
- Comprehensive knowledge of British Columbia Regulations.
- Must possess a valid vehicle operating license.
