

Senior Corporate Planning Analyst

THE COMPANY

Headquartered in Calgary, Alberta and with operations near Fort St. John, British Columbia, Pacific Canbriam Energy Limited ("PCE") is committed to our 5Cs business philosophy of creating benefits for our Community, Country, Climate, Customer, and Company.

Pacific Canbriam believes that the quality of its resource is a strategic asset that differentiates the company. Early efforts to identify a scalable, low cost supply source led to a focus in the Altares and Kobes Montney regions in northeast B.C. The Montney is a world class resource and Altares is among the highest quality areas. The region possesses a unique combination of thickness and over-pressure, which contributes to highly efficient stacked resource development and strong well deliverability. Pacific Canbriam's Montney resource also possesses a high liquids content and overall rock quality that translates into a highly competitive supply cost.

We believe that teamwork is the foundation of our success. We have established a culture where problem solving skills and critical thinking are highly valued. Individual technical disciplines collaborate to achieve common objectives and continuously improve results. PCE's strategy and its culture are centred on this commitment.

The next iteration of our integrated approach relates to the planned export of our natural gas to markets in growing economies overseas. To achieve this aim, PCE will supply B.C.'s proposed Woodfibre LNG project, which will liquefy the natural gas and load it into vessels. The natural gas will be shipped to help supply a growing demand for cleaner sources of energy in Asia.

THE POSITION

We are seeking a Senior Corporate Planning Analyst to become a key member of the Pacific Canbriam Corporate planning team. Supporting planning and analytical activities across the company, the successful individual will bring their professionalism, energy, and enthusiasm to deliver excellent results in a fast paced and demanding work environment. This role is based in the corporate office in Calgary.

Key Responsibilities

- Support Budgeting and strategic planning exercises by facilitating reviews, providing sensitivity analysis, and maintaining accurate operating data in the corporate model
- Provide analytical support and prepare presentation materials for Finance, Business Development, Marketing, and Operations projects

- Identify areas for improvement and proactively enhance reporting accuracy, clarity, and process cycle times
- Create, develop, and maintain detailed economic models to support business development opportunities
- Prepare weekly and monthly reports and fulfill other ad hoc reporting requirements
- Engage in setting annual Key Performance Indicators, based on the Budget, for use in the Corporate scorecard. Track performance and provide analysis and insights at year end.

THE INDIVIDUAL

About You

- Enjoy working as part of an interdisciplinary team and are comfortable working with individuals at every level in the organization
- Be adept at delivering results on time, in a hands-on, high workload environment, through efficiency and prioritization
- Have high energy, be a self-starter and have a results-oriented work style combined with excellent communication and interpersonal skills
- Have a positive attitude and a drive to contribute to a high performing team
- Possess a keen attention to detail

Qualifications

- Undergraduate degree in a related field including accounting, business, finance, or engineering
- Minimum ten years of oil & gas industry experience, preferably in the Upstream sector
- Excellent analytical skills
- Strong Excel skills

Beneficial Experience

- Experience with the following software is beneficial: Enersight, QByte, AFE Navigator
