

## Senior Surface Land Representative

### THE COMPANY

Headquartered in Calgary, Alberta and with operations near Fort St. John, British Columbia, Pacific Canbriam Energy Limited ("PCE") is committed to our 5Cs business philosophy of creating benefits for our Community, Country, Climate, Customer, and Company.

PCE believes that the quality of its resource is a strategic asset that differentiates the company. Early efforts to identify a scalable, low cost supply source led to a focus in the Altares and Kobes Montney regions in northeast B.C. The Montney is a world class resource and Altares is among the highest quality areas. The region possesses a unique combination of thickness and over-pressure, which contributes to highly efficient stacked resource development and strong well deliverability. Pacific Canbriam's Montney resource also possesses a high liquids content and overall rock quality that translates into a highly competitive supply cost.

We believe that teamwork is the foundation of our success. We have established a culture where problem solving skills and critical thinking are highly valued. Individual technical disciplines collaborate to achieve common objectives and continuously improve results. PCE's strategy and its culture are centred on this commitment.

The next iteration of our integrated approach relates to the planned export of our natural gas to markets in growing economies overseas. To achieve this aim, PCE will supply B.C.'s proposed Woodfibre LNG project, which will liquefy the natural gas and load it into vessels. The natural gas will be shipped to help supply a growing demand for cleaner sources of energy in Asia.

### THE POSITION

PCE is currently searching for a Senior Surface Land Representative that will report to the Manager, Land. This role will coordinate the timely and accurate negotiation, acquisition, and maintenance of surface rights for well sites, roads, pipelines, and facilities. The Senior Surface Land Representative represents the company and interacts extensively with internal operational and technical teams as well as public and regulatory bodies. The successful candidate will foster and maintain relationships with all stakeholders and ensure surface acquisition and consultation compliance in accordance with the British Columbia Oil and Gas Commission directives and British Columbia Regulations.

### *Key Responsibilities*

- Coordinate surface rights acquisitions and maintenance on Freehold and Crown land in BC.
- Respond to surface rights requests and concerns from internal and external stakeholders.
- Maintain relationships with landowners, regulators, government agencies and overlapping tenure holders.
- Coordinate applications with Surface Land Coordinator and application deliverables for wells, roads, pipelines/facilities, ancillary sites, and any associated regulatory application required by PCE relating to a development.
- Engage in effective and accurate communication with internal stakeholders (i.e.: Drilling and Completions, Pipeline/Facilities, and Operations Teams) via project acquisition updates.

- Stay apprised of changes to BC regulatory framework as it pertains to surface rights acquisitions and maintenance and the timely dissemination of the implications of these potential changes to PCE's business practices.
- Liaise with operations staff on field related concerns, manage road infractions and coordinate with Land Administrator. Communicate with the Land Manager on issues that may arise.
- Attend construction kick-off meetings and coordinate the attendance of Qualified Professionals to communicate expectations of construction package (i.e., Environmental Protection Plans, Archaeology concerns etc.)
- Provide support on Dormant Site, Abandonment and Reclamation programs. Coordinate third party requests with Surface Land Coordinator.
- Partner with HSE group on asset integrity work programs, engaging with Landowners/Stakeholders for right of entry, and damages.
- Work with Sustainability Analyst and Land Manager to ensure the surface land ESG commitments have been addressed and updates are current.
- Review, code and approve invoices from surveyor, engineering, archaeology, land, and environmental companies.
- Manage special projects as required or directed by Land Manager.
- Travel to the Ft. St. John area will be required on an as-needed basis.

## THE INDIVIDUAL

### *About You*

- Strong organization, communication and interpersonal skills and the ability to work effectively with diverse teams across the business.
- Ability to work with minimal supervision, taking multiple tasks across the finish line simultaneously.
- Excellent analytical and problem-solving skills.
- Self-motivated and strong time management skills.
- Excellent communication and organization skills.
- Ability to self-start, prioritize workload.

### *Qualifications*

- Olds College Land Agent Diploma or equivalent education and experience.
- Minimum of 10 years' related experience. Previous British Columbia work experience would be an asset.
- Working knowledge of Landrite, Geoscout, AFE Navigator, GIS Programs.
- Comprehensive knowledge of British Columbia Regulations.
- Possess a valid vehicle operating license.

## APPLICATION PROCESS
